

DBP Series Data Barrier Protection

Designed for business and industrial applications, these products provide protection for local area networks, CCTV/video equipment, computer serial communication interfaces and process control systems against the damaging effects of transient overvoltages caused by lightning, AC power systems and other electrically "noisy" sources.

Low energy and seemingly harmless transients can cause gradual degradation of the sensitive integrated circuits used in network interfaces and CCTV hardware. This will lead to the eventual failure of the equipment.

At the other end of the scale are the high energy surges induced by lightning and direct short-circuit contact with power cables which can result in the immediate destruction of circuitry.

Computer network systems using coaxial or twisted pair cabling are subject to electrical interference pick-up from surges caused by earth potential differences - a particular problem for LANs running between buildings. Low energy transients can be the result of electrostatic discharge and power switching in electrical machinery.

Due to earth potential differences, long-distance cables, such as RS422 and RS485 systems operating over large areas, are particularly susceptible to the effects of lightning strikes even when they are several miles away.

The DBP Series offers low cost and effective surge suppression for applications where cables leave the security of the office and enter electrically harsh environments.

Features

- Exceptionally high surge handling capability meets the 10kA requirements of BS6651:1999 Annex C, to provide long life and low maintenance
- Meets the requirements of BS EN62305-4:2006 (which replaced BS6651:1999 Annex C in August 2008) and BS EN61643 21/22
- BS6651:1999 Annex C location category C
- Rugged construction (grey moulded plastic).
- DIN rail mounting for modular installation.
- DIN rail earthing provided for ease of installation.
- ST models provided with two port push in screw terminal connectors for ease of installation or replacement.
- Panel mounting screw holes for permanent installation.
- Low "let through" voltages.
- Fast response times.
- Negligible effect on normal line operation.
- · Additional earth stud provided for installation versatility.
- Many models offer lower line resistance and higher line current capability than most other competitors products.

Instant protection from surges caused by:

- · Lightning.
- Nearby power systems.
- Power-cross faults (direct contact with power cables).
- Electrical machinery.
- Electro-static discharge.

Applications

- Building-to-building serial communication.
- Long-range data acquisition and display systems at sports venues.
- Plant and process control systems.
- Signalling and telemetry to remote sites.
- "Intelligent" stage lighting.
- Local area networks (LAN)
- Office computer networks.
- Electronic cash registers (EPOS).
- Ethernet (10Base2, 10Base5 & 10BaseT), Cat 5, RS485, RS232, RS422 and Token Ring
- Closed circuit television (CCTV security).

DBP/2/06

RS485 ST BARRIER

A barrier protector designed for RS485 lines providing screw terminals for secure connection. Intended for hardwired installation on remote computer controlled equipment.

DBP/2/30

This device provides protection for process control applications using 4-20mA current loop signalling. A pluggable terminal strip allows the unit to be readily disconnected once wired into the circuit.

DBP/4/06

RS485 ST BARRIER

DBP/4/15

RS422 ST BI-POLAR BARRIER

DBP/4/50

TWISTED PAIR BARRIER

A barrier protector designed for twisted pair data communication signal lines up to 50 volts. Intended for hardwired installation and provided with screw terminals for secure connection.

DBP/2/15

RS232 ST BARRIER

A barrier protector for RS232 serial communications requiring hardwired installation in low-risk situations. Ideal for short building-to-building cable runs and where cables pass through a factory area.

DBP/2/50

TWISTED PAIR BARRIER

A barrier protector designed for twisted pair data communication signal lines up to 50 volts. Intended for hardwired installation and provided with screw terminals for secure connection.

DBP/4/15

RS232 ST BARRIER

A barrier protector for RS232 serial communications requiring hardwired installation in low-risk situations. Ideal for short building-to-building cable runs and where cables pass through a factory area.

DBP/4/30

4-20mA ST 2-PAIR LOOP BARRIER

A version of the 4-20mA Current Loop Barrier provides dual-pair protection required on systems using bi-directional data transfer or process control signalling.

DBP/RJ45/100BT

CATEGORY 5 BARRIER

Provides primary level surge protection for category 5 cabling installations using RJ45 modular jack connectors.

DBP/RJ45/100BT

TOKEN RING BARRIER

This barrier device provides protection for Token Ring systems using RJ45 modular jack connectors.

DBP/RJ45/100BT

10BASET BARRIER

Designed for Ethernet 10BaseT (twisted pair) systems with RJ45 modular jack connectors.

DBP/BNC/10B2

10BASE2 BARRIER

Provides primary level surge protection for Ethernet 10Base2 (ThinNet or CheaperNet) systems with BNC connectors.

DBP/N/10B5

10BASE5 BARRIER

A barrier protector designed for Ethernet 10Base5 (ThickNet) systems with 'N' type connectors where "backbone" cables connect buildings.

DBP/BNC/CCTV

CCTV & VIDEO BARRIER

Designed to protect CCTV video systems with coax connectors.
Particularly ideal for remotely situated cameras with BNC connectors.

DBP/2/CCTV

CCTV & VIDEO ST BARRIER

Similar to the CCTV & VIDEO BARRIER, this unit is designed specifically for CCTV video systems requiring hardwired installation. Particularly ideal for systems using twisted pair or with no standard connection in remote areas.

Cable TV / Satellite System Barrier

Provides surge protection for Cable TV and Satellite Systems. Protection is provided against the damaging effects of transient overvoltages caused by lightning, AC power sub systems and other electrically "noisy" sources.

Specifications				
Part Code	DBP/2/06	DBP/2/15	DBP/2/30	DBP/2/50
Description	RS485 ST Barrier	RS232 ST Barrier	4-20mA ST Loop Barrier	Twisted Pair Barrier
Connectors	Screw Terminals 2-Wire	Screw Terminals 2-Wire	Screw Terminals 2-Wire	Screw Terminals 2-Wire
Nominal Working Voltage (DC)	6V	15V	30V	50V
Maximum Working Voltage (DC)	7.5V	6.5V	36.5V	58V
Current Rating (Signal)	1.25A	1.25A	1.25A	1.25A
Clamping Voltage (1)	11V	27V	45V	75V
Maximum Surge Current (2)	10kA	10kA	10kA	10kA
Line Resistance (±10%)	1Ω	1Ω	1Ω	1Ω
Response Time	<10ns	<10ns	<10ns	<10ns
